

PNEUMATIC ADVANCED TRAINING

Rankin Automation is pleased to offer Advanced Pneumatic training to those seeking an in-depth understanding of pneumatics. This course is designed for those who completed our Pneumatic Fundamentals course or already have a working knowledge of pneumatic component selection, sizing, and symbol reading. Training modules will focus on the design requirements, calculations, and best practices involved in clamping, lifting, moving, and rotating using pneumatics. In addition, vacuum gripping/holding will be discussed. Labs will provide practical application and troubleshooting knowledge for each module.

COST & REGISTRATION

\$400 per person

Snacks/Lunch/Giveaways Included
