

PNEUMATIC FUNDAMENTALS TRAINING

Rankin Automation is pleased to offer basic Pneumatic training to those in the greater Philadelphia area. Education in the fundamentals of compressed air production, preparation, and distribution are paired with hands-on applications of valves, actuators, and control elements used in an industrial automation setting. Participants will walk away with the tools necessary to select the correctly sized components for pneumatic applications, read/design/build basic pneumatic circuits, and troubleshoot problems.

COST & REGISTRATION

\$400 per person

Snacks/Lunch/Giveaways Included
